## Lighthouse Environmental Programs LEP

LEP supports key programs in Island County and around the State

Dollars for LEP are generated by the more than 3000 holders of the Lighthouse License Plate. Each plate generates \$28 annually which is tax deductible. Plates can be acquired at any licensing office in the state and online at renewal time.

In 2005 the Washington State Legislature authorized LEP to be the benefactor of the funds raised each year by the sale of the plate. All funds stay in Washington State.

### Your dollars add up:

Through ongoing grants, LEP has passed on more than a quarter of a million dollars to 12 lighthouses for restoration and interpretation.

By providing continuous support for Sound Water Stewards educational programs, both children and adults have gained an increased understanding of coastal living, shorelines, marine habitats and the creatures inhabiting them.

Over the years, thousands of children have become excited about the natural world through our funding of Whidbey Watershed Stewards' outdoor classroom.

Our long time support of WSU Waste Wise volunteers reduces plastic and toxic waste.

For information contact the Whidbey based non-profit at P.O. Box 565, Coupeville, WA 98239. LEP's website is: [www.washingtonlighthouses.org](http://www.washingtonlighthouses.org)

## You Can Make A Difference!

Keep Washington Shining  
Available at all vehicle licensing offices  
and online and tax deductible

Here is what you need to know about putting a lighthouse plate on your car, pickup truck, motorcycle, or trailer. [www.dol.wa.gov](http://www.dol.wa.gov)

1. This plate and the funds it generates supports all Seahawk players, their families and all of their fans here in the Puget Sound and Washington. That is because this plate and its funds work hard to make sure we all have clean water for fish, crab, orcas, for boating and just enjoying.
2. This plate funds hundreds and hundreds of volunteers investing in making our Puget Sound home better. They educate and do collaborative research with state and federal agencies focused on keeping our Puget Sound safe and clean for all creatures. Did we mention they offer lots and lots of education to adults and kids?
3. This plate, as one would expect, is ALSO about lighthouses. It focuses on helping volunteer groups who keep lighthouses open to the public in Washington by helping them restore and interpret their lighthouses.
4. This publication is about how to visit the lighthouses of Washington State. You can help them and the waters they protect by putting a Washington State Lighthouse Plate on your vehicle. Go to [www.washingtonlighthouses.org](http://www.washingtonlighthouses.org) to learn more. This publication is sponsored by Lighthouse Environmental Programs a non profit of Washington and a 501-c-3.

## The Lighthouses of Washington State

Visiting, Restoring, Protecting

## SEATTLE TACOMA LOOP

### West Point

Seattle's Beacon for Elliot Bay sits on West Point in Discovery Park. It was Built in 1881.

10

### Point Robinson

Originally built in 1885 and rebuilt in 1915, the light and fog station are located in Vashon Island Public Park.

12

### Browns Point

Built in 1934, Browns Point presides over the entrance to beautiful, dog-friendly Commencement Park and the Port of Tacoma.

## NORTH PUGET SOUND LOOP

1

### Admiralty Head

The original lighthouse, built in 1861, predates the 1903 Spanish style sentinel that now overlooks stunning Admiralty Inlet. It sits on Whidbey Island today in Fort Casey State Park. It supports a substantial giftshop.

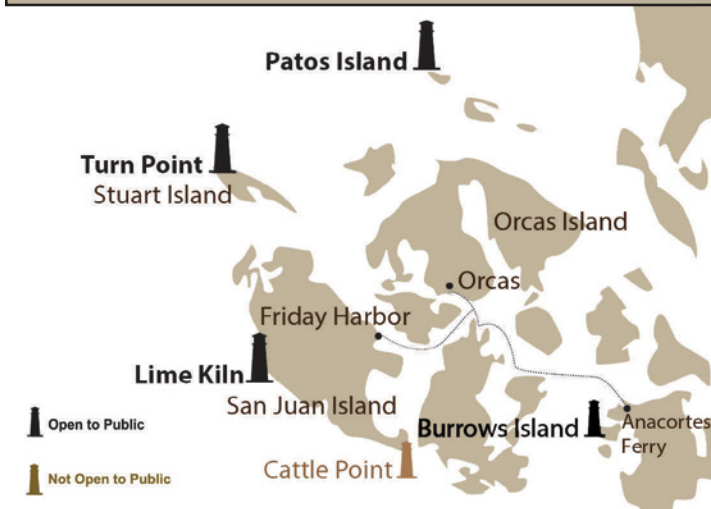

2

### Mukilteo

As a focal point of Mukilteo Lighthouse Park near the ferry slip on Front Street, this 1906 still functioning lighthouse marks Possession Sound.

## SAN JUAN ISLANDS LOOP

6

### Patos

The remote Patos Island sentinel continues to be an active aid to navigation. It is sited on the northernmost of the San Juan Islands in what is now a 207 acre marine park.

### Lime Kiln

The last lighthouse built in Washington, Lime Kiln is an Orca sighting station. A hydrophone that picks up whale communication is located at the lighthouse.

7a

### Turn Point

This active aid to navigation at Stuart Island is unique. Its light sits atop a concrete pillar.

The station is beautiful but accessible only by boat.

7

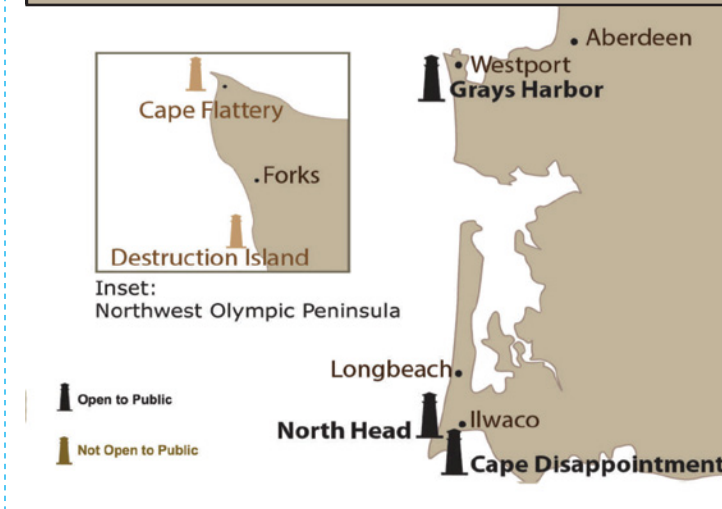

### Burrows Island

Restoration is ongoing at the massive 1906 Keepers' Quarters, and tours are offered when the crew is on site, or by special arrangement.

8

## WASHINGTON COAST LOOP

13

### Gray's Harbor

One half mile away from shore and standing at 107 feet, the tallest lighthouse in Washington has stood watch in Westport since 1898 signaling to both coastal vessels and those entering into the harbor.

### North Head

Since 1898, North Head Lighthouse has been guarding the entrance to the Columbia River, one of the windiest places on the West Coast.

15

### Cape Disappointment

Built in 1856, the oldest still active lighthouse in the state aids ships entering the Columbia River and is located in Cape Disappointment State Park.

14

## NE OLYMPIC PENINSULA LOOP

3

### New Dungeness

Guarding the tip of Dungeness Spit at Sequim, this 1857 active lighthouse is the second oldest in Washington. It is staffed by volunteer light keepers all year.

### Point Wilson

Sitting right where the Strait of San de Fuca turns into Admiralty Inlet, Point Wilson is considered to be a critical lighthouse in our state because of its strategic location.

4

5

### Point No Point

Standing watch on the northeastern tip of the Kitsap Peninsula, Point No Point Lighthouse is thought to be the oldest lighthouse on Puget Sound in continuous operation.
